

Daniel Eduardo Jaimes Gamboa

Junior Developer

profile

Junior Frontend Developer with a high school diploma and experience developing functional digital solutions. Specializing in web layout using HTML and CSS, with strong skills in process automation using Python and version control with GitHub. Has designed visual interfaces for the e-commerce sector and developed inventory management systems for community environments. Distinguished by high adaptability and commitment to quality in every project. Currently seeking opportunities to contribute their technical skills in frontend development and strengthen their bilingual profile in professional settings.
